THE DUCKING-STOOL. Our Anglo-Saxon ancestors used to punish women who disturbed the public peace by scolding and brawling, by immersion in water. A common scold was regarded as a pubprimitive days of the English people, after indictment and conviction, she was placed upon the ducking or cucking-stool and soused into the cold water. Many specimens of this engine of correction are still preserved in England. There is one in the town hall at church at Leamington; and yet another at in Scarboro. This last is a suben ardi-chair, with an iron bar extending from elbow to elbow, to prevent the escape of the occupant, as a wooden bar is sometime placed in a child's chair to prevent its falling out. The ducking-stool has not been used in England during the present century. The old newspapers and periodicals give elaborate accounts of the numerous scolds that had been punished by this dreaded instrument. The readers of the Appeal will be surprised to learn that scolding was once an offense at common law in the United States, and was punished by the American people by the same instrument formerly used in England. The colonial assembly of Maryland, at its session in 1683, passed "an act for erecting a pillory, stocks and ducking-stools in every county in this province." In Pennsylvania counts in reference to a new treaty makes Senor session in 1683, passed "an act for erecting a men themselves, will make statements utterpillory, stocks and ducking-stools in every county in this province." In Pennsylvania the instrument was hald in high respect. The the instrument was held in high respect. The grand jury of Philadelphia, in 1717, made presentment as follows:

MEXICAN TREACHERY.

Austin (Texas) State Gazette, 11th: "In an interview with Adjutant-General Steele yesterday, he advanced the opinions here ex-pressed. The most serious trouble with our show themselves to-night more charming than before, having the benefit of the two previous evening's experience. Never, we venture to say, has our Theater seen an occasion which touched more closely the hearts of our citizens, than this effort on behalf of the monument of General Robert E. Lee will prove to-night. The spirit that led the ladies of Memphisto toil and to endure in the days of the war, and that impelled our youth to the battle-field, will arouse and fill well with warm enthusiasm the breasts of thousands to-night, so that the aspect of the spectrum, he advanced the Opinions derical pressed. The most serious trouble with our Mexican neighbors occurs between Eagle Pass and the mouth of the Rio Grande, a distance of some four hundred miles, where the contest is between Mexican thieves, who live on the Mexican side, and Mexican and other thieves, who, for reasons best known to themselves, have taken up their aboute on the Texas side of the river. The people on both sides are the section of some four hundred miles, where the contest is between Mexican thieves, who live on the Mexican side, and Mexican and other thieves, who, for reasons best known to themselves, have taken up their aboute on the Texas side of the river. The people on both sides are the same in origin and language, so that a man of Anglo-Saxon origin cannot travel without being observed, while a Mexican can travel freely without question, on either side of the river. The claims of robber of the river. The claims of robber of Mexicans made by the Mexican border commission will show that robberies complained of were largely made by men whose plained of were largely made by men whose names point to what is in reality the truth, that these robberies were made by Mexican thieves who were domiciled on our side of the line. These men are citizens of Mexico or of Texas, as it happens to be convenient to their Texas, as it happens to be convenient to their operations of stealing from one side to sell on the other. No other than a Mexican can enter into this thieving business with any prospect of success, for the reason that the natives have entire control of this hitherto lucrative business, and they do not like to be interfered with by foreigners. I have no doubt but that we have rascals enough to engage in this business if it were I have no doubt but that we have rascals enough to engage in this business if it were not from the fact that they must work to such great disadvantage, and the disadvantage is increased by the knowledge that the highest officials are partners in the wholesale robberies from Texas. In fact, it was clearly proven that General Cortina had a contract for the delivery of cattle for the Cuban market, and that one steamship was freighted off the mouth of the Rio Grande, under that contract, with cattle, a large portion of which were stolen from Texas, and that the delay in loading the first steamer was owing to the operations of M'Nelly's company interfering with the successful continuance of this business operation. It is also well known that the city of Matamoros and the villages of Camargo,

For instance, in his reply to my ques-tion whether belief be voluntary or involunton whether belief be voluntary or involun-tary, he says it is "involuntary in the pres-ence of convincing evidence," and yet "vol-untary so far as searching out and weighing the evidence goes." That is, belief is volun-tary while you are searching out the evi-dence, and involuntary after you have found it to be "convincing!" This is logic! Will "Nut-Cracker" tell us who must be "convinced" by this evidence? If I am honestly searching out the evidence necessary for "convincing," must I be "convinced," or
